

Please ban usage of cel phones on planes. If the airlines and cel phone companies designate on flights, non cel phone seating vs cel seating to guarantee the rest of us not to have to listen to cel phone users conversation, maybe. But that did not work with non smoking vs smaoking on planes either. What could anyone do if they got a call that was an emergency on a flight? They still need to wait until their destination until they could do anything. Fear or use of fear should not be the deciding factor (ie 9/11 flights)

Thanks
